After completing an intensive Full Stack Web Development bootcamp at UC Berkeley Extension, I'm eager to reenter the workforce and reignite my passion for coding. With nearly four years of prior experience as a software engineer, my expertise lies in Java development, web application development, and Android mobile app development.

During the bootcamp, I updated my skills by developing various web applications using JavaScript, React, Bootstrap, and Node.js, and seamlessly deploying them on platforms like Heroku, Render, and Netlify. I thrive in collaborative environments and effectively engage in online teamwork using GitHub and Slack. Ready to contribute my expertise to innovative projects and teams.

TECHNICAL SKILLS

HTML5, CSS3, JavaScript, Bootstrap, Node.js, MySQL, MongoDB, Express, Handelbars.js, and ReactJS, Java, Android.

EXPERIENCE

Software Engineer   **Apr 2011 – Feb 2013**
Revenue Development Foundation   **London, UK**
Revenuedevelopment.org

Maintained and improved the web application used for collecting and validating mineral extraction licenses for private companies in developing countries in Africa.
Key Accomplishments:
- Self-taught Groovy, Grails, and PostgreSQL to effectively work on the existing web application.
- Developed the organization's first mobile application on Android, enabling field workers to validate company work against granted licenses.

Android Developer   **Aug 2010 – Mar 2011**
Personal Project   **London, UK**
Pipedreamer

Self-learned Android development and created a kid's game from scratch. Collaborated with a graphic designer from Argentina to ensure high-quality graphics for the game.
Key Accomplishments:
- Published the game on Google Play, achieving over 15,000 downloads and providing a fun and enjoyable experience for users.

Web Developer   **Feb 2010 – Jul 2010**
Urban Eye (Non-Profit)   **London, UK**
www.urbaneye.org.uk

Assisted Urban Eye in integrating PayPal technology into their website, improving their online fundraising capabilities.

Java Developer   **Aug 2006 – Feb 2007**
Soluciones Integrales   **Buenos Aires, Argentina**

- Worked as a Java developer, contributing to the development of software solutions for water companies.
- Gained hands-on experience in Java development, enhancing my programming skills. J2EE, Oracle and Informix databases.

PROJECTS

Full Stack Service app | **full-stack-service-app** | **github.com/full-stack-service-app**
- Summary: Web application designed to make it easier to find, contact, and pay for jobs.
- Tools: MERN, React, GraphQl, Redux, Node.js

Culinary Connect | | **mvc-culinary-connect.herokuapp** | **github.com/mvc-recipe-sharing**
- Summary: In this Recipe Sharing site, users can publish their recipes, comment on other user's recipes.
- Tools: Express, Sequelize, SQL database, Heroku, JavaScript, Bootstrap.

MovieMix & Sip| | **/movie-cocktail-combo** | **github.com/movie-cocktail-combo**
- Summary: Front end application, users can search for a movie and received a drink recommendation,
- Tools: JavaScript, git, CSS.

EDUCATION

Certificate in Full Stack Web Development   **Jan 2024, CA**
UC Berkeley Extension
An intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, JQuery, Bootstrap, Node.js, MySQL, MongoDB, Express, Handelbars.js, and ReactJS.

Computer Science Licentiate   **Feb 2008, Argentina**
Universidad Nacional del Sur
